### Appendices

- 1) [Health and Safety Audit](#)
- 2) [Asbestos Management Checklist](#)

## Statement of intent

Roxeth Primary School, has a duty to ensure that buildings under their control comply with the statutory and regulatory standards.

The school will consider each building's:

- Condition – focussing on the physical state of the premises to ensure safe and continuous operations as well as other issues involving building regulations and other non-education centric statutory requirements.
- Suitability – focussing on the quality of the premises to meet curriculum or management needs and other issues impacting on the role of the school in raising educational standards.

## 1. Legal framework

This policy will have consideration for and comply with the following legislation:

- The Control of Asbestos Regulations 2012
- The School Premises (England) Regulations 2012
- Health and Safety at Work etc. Act 1974
- The Management of Health and Safety at Work Regulations 1999
- Statutory Premises Management Documents
- School Standards and Framework Act 1998
- The Education (School Premises) Regulations 1999
- Equality Act 2010
- The Lifting Operations and Lifting Equipment Regulations 1998 (LOLER)

This policy will also have due regard to the following statutory and non-statutory guidance:

- DfES (2000) 'Guidance on first aid for schools'
- DfES (2018) 'Health and safety: responsibilities and duties for schools'
- DfES (2020) 'Managing asbestos in your school'
- DfES (2015) 'Advice on standards for school premises'
- DfES (2020) 'Good estate management for schools'

This policy operates in conjunction with the following school policies:

- Asbestos Management Policy
- Asbestos Management Plan
- School Cleaning Policy
- Asset Management Policy
- Health and Safety Policy
- Lettings Policy
- First Aid Policy
- Adverse Weather Policy
- Invacuation, Lockdown and Evacuation Policy
- Whole-School Food Policy
- School Cleaning Policy
- Fire Safety Policy
- School Security/Safeguarding Policy

## 2. Roles and responsibilities

The governing board is responsible for:

- The overall implementation of this policy.
- Ensuring the proper maintenance and repair of the school.
- Ensuring asbestos is managed in line with the Asbestos Management Policy.
- Ensuring the school is accessible and suitable for pupils, staff and visitors with SEND.

- Ensuring that the school complies with the relevant health and safety and premises management legislation.

The Health & Safety Officer/ Finance Officer & Site Supervisor is responsible for:

- Ensuring that the school's fixtures, fitting and furnishings are high-quality and value for money.
- Coordinating and supervising maintenance and repair work, including securing any external contractor where necessary.
- Managing any lettings in line with the Lettings Policy.
- Purchasing new equipment and resources for the school.

The Premises Manager is responsible for:

- In collaboration with the Headteacher, the day-to-day implementation and management of the stipulations outlined in this policy.
- Identifying and undertaking any maintenance and repair work.
- Conducting the [Health and Safety Audit](#).
- Conducting the [Asbestos Management Checklist](#).
- Checking the school's compliance with the relevant health and safety and premises management legislation, and reporting any issues to the governing board.
- Ensuring that hygiene is maintained at the school, including that the appropriate drainage is in place.
- The security of the school, including locking down the school after-hours and reopening the school.
- Conducting the relevant premises risk assessments, e.g. fire safety.
- Arranging for periodic inspections to take place to comply with the requirements of the Electricity at Work Regulations 1989.

The Headteacher is responsible for:

- Ensuring the safety of the school's staff and pupils.
- Reporting any issues with the premises to the Premises Manager, Health & Safety Officer and Governing Board as appropriate.
- Ensuring that the premises needs of people with SEND are met, e.g. accessibility.
- Managing the relevant staff members who are responsible for the management of the premises, e.g. catering staff and Premises Manager.
- Reviewing this policy in liaison with the Premises Manager.
- Ensuring any potential risks are identified, formally recorded, assessed and managed. This should include taking appropriate preventative and protective measures.

### 3. Asbestos

The governing board, Headteacher and Premises Manager will ensure that the school meets its duty to manage asbestos in school.

A duty holder will be appointed who will be responsible for ensuring that asbestos materials are properly managed. The appointed person will be provided with the resources, skills, training and authority required to ensure the asbestos materials are managed effectively.

The school will have an asbestos register (including associated remedial actions) and an Asbestos Management Plan.

The Premises Manager will review the school's Asbestos Management Plan annually. All staff and workers in your school or college will receive adequate training and understand what precautions, detailed in the Asbestos Management Plan. The Premises Manager will ensure that all staff are informed of any asbestos located within the school. The Premises Manager will arrange for any necessary repairs to the school regarding asbestos in collaboration with the Headteacher & the Governing Board.

The Headteacher will ensure that the stipulations in the Asbestos Management Policy are adhered to at all times.

The Premises Manager and Headteacher will ensure that an asbestos survey is undertaken by a qualified contractor whenever necessary and that the outcomes are recorded.

The Premises Manager will regularly monitor the effectiveness of the asbestos management arrangements to ensure that the risks are controlled.

#### **4. Water supply**

The Premises Manager will ensure that the school's water supply meets the regulatory requirements by carrying out the necessary checks at appropriate intervals, so that:

- The school has a clean supply of water for domestic purposes, including a supply of drinking water.
- Toilet facilities have an adequate supply of cold water and washbasins, and sinks and showers have an adequate supply of hot and cold water.
- Hot water at the point of use does not pose a scalding risk.

Risks relating to legionella bacteria will be managed by the school in the following ways:

- A competent person will be appointed to take day-to-day responsibility for controlling any identified risks i.e.: Premises Manger. Regular checks by the LA and flushing of taps.
- Sources of risk will be identified and assessed in line with the HSE's Approved Code of Practice [L8](#).
- A written scheme (or course of action) for preventing or controlling risks will be implemented and this scheme will be monitored.
- Records will be kept of checks conducted to ensure measures in place are effective.
- The LA will be notified that there is a cooling tower on the school site.
- A legionella risk assessment and the preparation of the course of action will be undertaken by a company which offers these specialist services.
-

## 5. Temperatures

Where there is a below-normal level of physical activity due to ill health or a physical disability, e.g. isolation rooms, the heating systems will be able to maintain a temperature of 21 °C. Where there is a normal level of physical activity associated with teaching, private study or examinations, the heating systems will be able to maintain a temperature of 18 °C. Where there is a high level of physical activity, e.g. PE sports halls, washrooms, sleeping accommodation and circulation spaces, the heating systems will be able to maintain a temperature of 15 °C.

The school's heating systems will be capable of maintaining the above criteria at a height of 0.5 metres above floor level when the external air temperature is –1 °C.

The surface temperature of any radiator (including exposed pipework) that could be touched by a pupil will not exceed 43 °C.

Air extract systems will be employed to maintain a safe environment by removing hazardous fumes and dust. Local Exhaust Ventilation Systems (LEVs) may be used in fume cupboards and in workshops. These systems will be examined and tested at least every 14 months.

Closed water circuits which operate under pressure will be checked periodically for leaks.

Fan heaters will be checked and inspected periodically to check the fan operation and condition of electrical connections.

Air conditioning systems will be inspected by an energy assessor at regular intervals, not exceeding five years. Bi-annual checks and an annual maintenance schedule will also be undertaken.

## 6. Toilet and washing facilities

The following toilet and washbasin facilities will be in place:

- For pupils aged 3-5, there will be 1 toilet and washbasin for every 10 pupils.
- For pupils aged 4-5, there will be 1 toilet and washbasin for every 20 pupils.
- For pupils over 5, there will be 1 toilet and washbasin per 15-20 pupils, which will be segregated into male and female for those over 8.
- No more than 2/3rds of boys' appliances will be urinals.
- For pupils over 11 years old, there will be 1 toilet and washbasin per 20 pupils, which will be segregated into male and female.

Toilet and washing facilities will be planned to ensure that:

- Hand washing facilities are provided within the vicinity of every toilet.
- The facilities are properly lit and ventilated.
- They are located in areas that provide easy access for pupils, and allow for supervision by members of staff, without compromising the privacy of pupils.

- Disabled toilets will have a toilet, washbasin and where possible, a shower or wash-down fitting.
- Disabled toilets will have a door opening directly onto a circulation space that is not a staircase and can be secured from the inside.
- Where possible, a number of facilities will be available, to ensure a reasonable travel distance that does not involve changing floor levels.
- Where possible, shower areas will be separate from toilets, and they will provide adequate privacy.

The Headteacher will ensure that there are appropriate facilities in place for pupils who are ill, including:

- A room for medical or dental examination.
- A washbasin.

## **7. Accessibility**

To be compliant with the Equality Act 2010, the Headteacher and SENCO will create an accessibility strategy, to ensure the premises is accessible to pupils with SEND. The accessibility strategy will include the health and safety needs of pupils with SEND. The school will take account of its Accessibility Policy when managing and maintaining the school site.

## **8. Drainage**

The Premises Manager will carry out regular checks to ensure that there is adequate drainage for hygiene purposes and for the disposal of waste water and surface water – external drainage specialists will be called in should problems arise.

The Premises Manager will ensure gutters are regularly cleaned. Ponding on roofs will be dealt with as a matter of urgency as it can cause deterioration of roof finishes and in severe cases can overload roofs contributing to structural failure.

## **9. Lighting**

Lighting will be appropriate for a learning environment, where possible, natural lighting will be used. Adequate views will be available to the outside, to ensure comfort and avoid eye strain and lighting controls will be easy to use.

Blinds or other window covers will be provided, to avoid glare or excessive sunlight. External lighting should also be provided to ensure safe pedestrian movement after dark.

Outdoor sports facilities will have floodlights if they are likely to be used out of school hours. Emergency lighting will be provided for areas which are accessible after dark.

As pupils with SEND can have additional needs, the school will cater for these. Some of these needs may include:

- Ensuring the school has colour and contrast, which helps in locating doors and handles, stairs and steps.

- Avoiding glare, including high gloss paint.
- Using light sources, such as high frequency fluorescent luminaires, to avoid subliminal flicker.
- Clearly marking large areas of glazing, e.g. with frosted glass, to avoid accidents.

The Premises Manager will arrange for fixed electrical systems to be tested around the school site. This will cover all of the electrical wiring within the buildings and grounds, including:

- External lighting and supplies
- Main panels
- Distribution boards
- Lighting
- Socket outlets
- Air conditioning
- Other fixed plants

## 10. Security

The Premises Manager will make adequate security arrangements for the grounds and buildings, including, but not limited to, ensuring:

- Each building is securely locked and alarmed each night.
- Each building has a secure entrance.
- The school's perimeters are sufficiently secure.

The school's security arrangements are based on a risk assessment, which is regularly reviewed by the Premises Manager / Health & Safety Officer and Headteacher, that explicitly considers the:

- Location of the school.
- Physical layout of the school.
- Boarding accommodation.
- Movements needed around the site.
- Arrangements for receiving visitors.
- Staff/pupil training in security.

The School Security Policy addresses the school's approach to ensuring the safety and security of all staff members, pupils and visitors.

## 11. Lettings

The Headteacher will be responsible for lettings and will ensure that the health, safety and welfare of pupils are safeguarded, and their education is not interrupted by others. The school's Lettings Policy will be adhered to at all times.

When letting to commercial businesses, the school will first seek the permission of the LA and the DfES; to contact the DfES, the school will email the details of the proposed letting to [schoolsassetscapital@education.gov.uk](mailto:schoolsassetscapital@education.gov.uk).

Hirers will make an application for hire to the governing board. When determining whether to approve an application; the governing board will consider the following factors:

- The type of activity
- Possible interference with school activities
- The availability of facilities
- The availability of staff
- Health and safety considerations
- The school's duties with regards to the prevention of terrorism and radicalisation
- Whether the letting is deemed compatible with the ethos of the school

An application will not be approved if the hirer's purpose:

- Is aimed at promoting extremist views.
- Involves the dissemination of inappropriate materials.
- Contravenes the statutory Prevent duty.
- Is likely to cause offence to public taste and decency (except where this is, in the opinion of the trust, balanced or outweighed by freedom of expression of artistic merit).

## **12. Weather**

The Site Supervisor will ensure that the school buildings provide reasonable resistance to penetration by rain, snow, wind and moisture from the ground by conducting regular visual checks. Any issues identified will be relayed to the Headteacher. The school's Adverse Weather Policy will be adhered to at all times.

## **13. Invacuation and evacuations**

The Premises Manager will ensure there is sufficient access so that emergency invacuations and/or evacuations can be completed safely for all pupils, including those with SEND, by ensuring that all entries and exits are kept clear and unobstructed, and by carrying out regular checks.

To ensure the safety of pupils with SEND, the Headteacher will liaise with the SENCO to establish the needs of pupils. Any issues will be reported to the governing board and SENCO, where appropriate.

When assessing the safety of the school, the Invacuation, Lockdown and Evacuation Policy will be considered, and reviews will be made where necessary.

## **14. Suitability**

The Headteacher will maintain the school by referencing the Environmental Health Authority's appropriate documentation, to avoid being condemned. The Health & Safety Officer and Site Supervisor will further ensure that, in terms of the design and structure of school buildings, no areas of the school compromise health or safety.

School premises, accommodation and facilities will be maintained to a standard that ensures, so far as is reasonable, the health, safety and welfare of pupils and staff.

Fire risk assessments will be undertaken to identify the general fire precautions needed to ensure the safety of occupants in case of a fire. Procedures will be in place for reducing the likelihood of fire including fire detection and alarm systems.

Staff and pupils will be familiarised with emergency evacuation procedures and risk assessments will be updated if there are any significant changes to the premises. All school procedures and provisions relating to fire safety are outlined in the school's Fire Safety Policy.

Those completing fire risk assessments, or providing advice in relation to them, will be

Fire detection and alarm systems will have a weekly alarm test. In systems with multiple manual call points, a different one will be tested each week, so that all are eventually included in the schedule of testing over a period of time.

The Premises Manager will ensure all fire doors remain in efficient working order and should be regularly checked and maintained.

## **15. Catering**

The Headteacher in consultation with the external Catering Manager, will ensure that where food is served there are adequate facilities in place for its hygienic preparation, serving and consumption. The school's Whole-School Food Policy will be adhered to at all times.

## **16. Cleaning**

The Site Supervisor will be responsible for cleaning staff and will ensure that classrooms and other parts of the school are maintained in a tidy, clean and hygienic state by monitoring standards.

The school's School Cleaning Policy will be adhered to at all times and adequate measures should be taken to prevent condensation and noxious fumes in kitchens and other rooms.

## **17. Acoustics**

Learning spaces will be designed in a way to enable people to hear clearly, understand and concentrate and there will be minimal disturbance from unwanted noise. Some learning spaces, such as music rooms or open areas, will require higher acoustic standards.

## **18. Maintenance**

The Headteacher & Site Supervisor will ensure that there is a satisfactory standard and adequate maintenance of decoration by implementing the school's planned maintenance programme, including the statutory and best practice checks outlined by the Health & Safety officer on completion of the annual [Health and Safety Audit](#). Most of this work will take place during holiday periods, but smaller tasks may be completed during term time after the termly checks carried out by the H & S Officer with the Premises Manager and linked H & S Governor.

A number of documents will be held to assist in managing the estate and ensure it is safe for all users. These will include certificates and details of all statutory examinations, testing and remedial work.

## **19. Furnishings**

The SENDCO, in consultation with the Headteacher and relevant heads of department, will ensure that the furniture and fittings are appropriately designed for the age and needs (including any SEND or medical conditions) of all pupils registered at the school.

Consideration will be given to specific requests for furniture and fittings generated as a result of the annual departmental review of furniture and fittings conducted by the Premises Manager.

## **20. Playing fields**

Under section 77 of The School Standards and Framework Act 1998, playing fields are protected from development.

## **21. Grounds**

The Headteacher, & Deputy Headteacher will ensure that there are appropriate arrangements for providing outside space for pupils to play and exercise safely. The condition of all playground areas will be monitored by the Premises Manager and deficiencies addressed.

The school will ensure, as far as reasonably practicable, that the premises are safe and without risks to health. This includes external areas and means of access to and from the school.

The school will ensure risks associated with individuals entering or leaving the school estate are assessed and the school perimeter will be secured and controlled accordingly.

There will be clear segregation and delineation of pedestrian and vehicular access routes, and separation of parking and playground areas.

## **22. Health and safety audit**

The Health & Safety Officer will ensure that the school's premises are subject to a regular [Health and Safety Audit](#). The Premises Manager will monitor that health and safety risk assessments are completed annually for contractors.

Any risks identified will be formally recorded, assessed and managed. This will include taking appropriate preventative and protective measures.

As well as formal risk assessments undertaken by competent persons, staff and pupils will be encouraged to report risks, and there will be a system in place to formally record and act on issues raised.

Risk assessments will be reviewed regularly and kept up-to-date. This could be as a result of changed circumstances such as bringing in new equipment, using an area for a different purpose or if someone reports a hazard.

Health and safety monitoring arrangements will be referred to when carrying out any repairs, maintenance and improvement projects.

### 23. Other equipment, systems and storage

In line with The Lifting Operations and Lifting Equipment Regulations 1998 (LOLER), the school will ensure that lifts used by employees for work are safe to use. Plans will be implemented to ensure the safety of users in the event of the lift breakdown or stopping between floors.

The school will ensure equipment used for physical education is safe to use. To ensure that equipment is maintained in a safe condition, it will be regularly inspected.

### 24. Monitoring and review

This policy is reviewed [annually](#) by the Headteacher and the Premises Manager. The next scheduled review date for this policy is [September 2022](#)

Any changes to this policy will be communicated to all relevant staff members.

Policy Date: September 2021

## Health and Safety Audit

Aspect	Existing document (Y/N)	Requirement	Review date
Access audit		Survey, report and access statement covering learning, teaching and physical access.	
Air conditioning		Dependent on refrigerant gas used, testing and servicing quarterly, six monthly or annually. Regular inspection required. ACEA – A/C Energy assessment every five years.	
Asbestos		Asbestos register and management plan.	
Car parking and vehicle/pedestrian segregation		General risk assessment required.	
Building and grounds condition survey		Inspection of building and facilities for asset management planning.	
Classroom assessment		Annual assessment with termly review.	
Control of substances hazardous to health (COSHH) risk assessment		For storage and use of any hazardous substances.	
Display energy certificate (DEC)		Requirement for buildings with floor area over 1000m <sup>2</sup> to display the energy use of the school buildings.	
Duct hygiene (air conditioning, plenum heating)		Inspection and testing, thorough cleaning routine determined from testing/inspection results.	
Electrical - Portable appliance testing (PAT)		Safety checking and testing of electrical appliances.	
Electrical – Fixed wire testing		Testing of all fixed wiring boards and all distribution boards every three to five years.	

Aspect	Existing document (Y/N)	Requirement	Review date
		Testing of all distribution boards in mobile accommodation annually.	
Electrical – Stage lighting		Annual test and inspection by a competent person.	
		Inspection and testing of portable dimmer racks with no fixed cabling, plugs, sockets, flexible leads every three months.	
Emergency lighting		Inspection and testing of system, monthly checks by the PPM's to check functionality and battery discharge tests.	
Extraction systems, including fume cupboards		Inspection and testing of dust extraction equipment.	
		Local exhaust ventilation.	
Fire risk assessment		Inspection and annual review, or whenever any changes are made that will affect the assessment.	
Fire alarm and detection systems		Weekly fire bell test, six monthly fire drill and annual service and inspection.	
Fire doors		Checked regularly to ensure functioning correctly.	
Fire extinguishers and appliances		Inspection and testing of equipment, if a sprinkler is installed, this may need more frequent testing to comply with insurance requirements.	
First aid equipment		Regular checks recommended replenishing equipment/stock and replacing out-of-date items.	
Floor plans		Up-to-date floor and roof plans are created when changes are made.	
Fuel oil storage		Plan of pipework and main isolation points annual update. Visual inspection and maintenance checks on all pipework devices.	

Aspect	Existing document (Y/N)	Requirement	Review date
Gas safety		Inspection and certification, identification and location of gas equipment and supplies – update.	
Gas appliance		Annual servicing for efficient operation and combustion.	
Gas pipework		Visual inspection and testing.	
Glazing		Requirement to survey buildings to identify where safety glazing should be and ongoing checks that any replacements are with the required glazing.	
Hydrotherapy and swimming pools		Risk assessment updated annually.	
Incoming services and isolation points		Do you know where your incoming water, gas and electrical mains are? This is useful for emergency planning in the case of an unexpected event.	
Lifts and hoists		Thorough examination, full maintenance and inspection.	
Lightning conductors		Inspection and full test to assess adequacy of earthing, evidence of corrosion.	
Mobile classroom stability		Structural inspection of mobile classrooms.	
Planned preventative maintenance (PMP)		PMP in place for all buildings, plants and equipment.	
		Current servicing records are available.	
		Annual maintenance inspections completed.	
Fixed playground and gym equipment		Inspection and testing.	
Radon		Risk assessment carried out and updated as necessary.	
Shared premises		Risk assessment carried out and updated as necessary.	

Aspect	Existing document (Y/N)	Requirement	Review date
Slips and trips		Risk assessment carried out and updated as necessary.	
Tree safety		Risk assessment carried out and updated as necessary.	
Water hygiene and safety, legionnaires' disease – water systems, cold water systems		Risk assessment and management plan for setting control measures where risks of legionella are identified. Visual condition and compliance inspection. Tank condition and water quality checks will be regularly undertaken.	
Legionnaires' disease – Low pressure hot water systems		Visual condition inspection. Maintenance checks on all pipe work, devices, valves, pumps, etc.	
Water and surface temperature		Risk assessment carried out and updated as necessary.	
Workstation assessment		Analysis of all workstations to assess any health and safety risks.	
Working at height		Risk assessment carried out and updated as necessary.	
Working at height – Safety eye bolts and cradles		Inspection and testing.	

## Asbestos Management Checklist

Criteria	Yes	Further action needed
<p><b>Is the school management team aware who has the overall legal responsibility for the management and repair of the school buildings?</b> The responsibility for managing asbestos falls to whoever is responsible for maintenance and repair of the school premises – this is the duty holder.</p>		
<p><b>Has the duty holder undertaken a management survey?</b> A management survey should identify what type of asbestos containing materials (ACMs) are present and where they are.</p>		
<p><b>Does the management survey highlight the location of ACMs?</b> All areas of the school premises should be included: storerooms; yards; outbuildings; underfloor services; pipes; ceiling voids; corridors, etc.</p>		
<p><b>Has the duty holder assessed the potential risk from the ACMs?</b> The assessment should consider the condition of the ACMs, whether they are likely to be disturbed and the action that is necessary to manage the risks.</p>		
<p><b>Does the duty holder have a management plan detailing how to manage the risks from any ACMs at your school?</b> The plan should bring together all the available information. It should outline what is going to be done, when it is going to be done, and how it is going to be done – both reactive and planned checks. It should set out clear lines of responsibility.</p>		
<p><b>Are precautions in place to ensure that anyone who may disturb ACMs is provided with information about any asbestos present?</b> The precautions should ensure anyone in-house or who comes to undertake any work on the premises does not start before they are given the information about any asbestos present.</p>		

<p><b>Are any in-house staff who may undertake maintenance work adequately trained?</b> Training needs to be appropriate for the work.</p> <p><b>Awareness training</b> – this is for staff whose work could expose them to asbestos while carrying out their everyday tasks. Awareness training is not sufficient for staff planning to carry out any work on ACMs.</p> <p><b>Training for work with asbestos that does not require a licence from the HSE</b> – this is for staff who plan to carry out any work on ACMs where the likelihood of exposure is much higher e.g. installing cables in areas containing undamaged asbestos materials.</p> <p><b>Training for asbestos work that does require a licence from the HSE</b> – this includes most work of asbestos insulation, asbestos insulating board and lagging, including sealing and removal. Licensed contractors must carry out most work with these higher risk ACMs.</p>
